Software Developer

Practical and versatile Full Stack developer with Agile and Remote work experience. Strong communication and problem-solving skills. Looking for a long term Full Stack or Front End role in a JavaScript environment, and open to learning new technologies.

Experience

Frontend Engineer

Apr. 2019 – Present

Habito *London, UK*

- Implemented interactive and Mobile-First tools, such as mortgage comparison calculators (React.js, Purescript).
- Improved delivery speed and consistency by implementing and maintaining a custom design system (Storybook, Loki).
- Collaborated with designers and stakeholders to implement responsive, accessible, and thoroughly tested features under demanding deadlines (Cyprus, Jest).
- Migrated sign-up functionality while ensuring a seamless transition for users.

Full Stack Developer

Oct. 2018 – Apr. 2019

Founders and Coders *London, UK*

- Highly selective full-time development course with strong links to the Tech for Good sector.
- Worked with clients in small agile teams of four. Gained experience as Scrum Master, QA, and DevOps.
- Built a MVP for our client curenetics.io. We were the only team in which the deliverable resulted in additional funding for the client.
- Conducted project assessment for startups resulting in User Research Questions.
- Notable areas of practice: Vanilla JS, TDD, PostgreSQL, Express.js, Semantic HTML, BEM, CI, User experience.

Customer Success Engineer

Feb. 2017 – Jan. 2018

Dataquest.io *San-Francisco, USA (Remote)*

- Worked in a small team of eight to prioritise and respond to online Data Science students (Python, Statistics, Machine Learning, data exploratory).
- Conducted reviews and QA of features prior to release in local, staging, and prod environment.
- Debugged customer issues, prioritized and monitored the process of bug fixing from report to fix release.
- Logged bugs and feature tickets, including reproducible tests for developers (React.js).
- Acted as customer advocate internally while effectively collaborated with team members.

Projects

Curenetics.io | [Github](#)

Dec. 2018 – Apr. 2019

MVP to help cancer patients find suitable clinical trial. This MVP helped secure our startup client with funding.

Sports & Rec | [Site](#) | [Github](#)

Jan. 2019 – Apr. 2019

MVP that helps people find free locations to play sports. Also served as Scrum Master of an agile team of four. Conducted a full week to design the project including users research.

Github User Info | [Site](#) | [Github](#)

Sep. 2018 – Present

Search and view Github users built for learning purposes. Some of the project issues were picked up by the Github community.
